Fire Place Hook Up Information

1. The key valve is located on the right side of the Fire Place
2. To gain access to the key valve you will need to remove the 2 vents on the back with a #1 square drive bit.
3. You will need 2 flex lines (3/8"); 1-36" flex line and 1-48" flex line.
4. From your gas supply, run the 48" flex line with a 1/2" standard male fitting to the key valve.
5. From the key valve, you will need a 1/2" standard female fitting attached to the 36" flex line to connect the burner.
6. To connect the burner you will need a 3/8" male flared fitting.
