Rotisserie Chart

Proper lighting technique

- Check for spark

- Check connection (ignition wire) from valve and back electrode

- If no spark clean around electrode point

- If spark is not present after cleaning electrode and ignition wire

- Contact a Bull Authorized Service Center or a qualified technician

- If sparking and burner is not igniting try to slightly bend the electrode points closer to the burner

- Test ignition system by using proper lighting technique, see "Rotisserie Cooking" in manual

- Cautiously ignite backburner with long fireplace style lighter to ensure burner has proper gas flow burner should glow bright red

- If the problem persists, contact a Bull Authorized Service Center or a qualified technician

- If all steps have been conducted and are unsuccessful please contact tech service at Bull
